SUMMARY

Committed Front-End Web Developer with a strong aesthetic sense, attention to detail, and an eye for design. Previous work experience within Business and Marketing positions, which taught me how to collaborate in a team environment with different people from various backgrounds and provided me a good understanding of a business environment.

SKILLS

Web Technologies:

HTML5, CSS3,
Sass/SCSS, Bootstrap, Tailwind

Programming Language:

JavaScript

Design:

Figma, Adobe XD

Web Server:

Firebase, Google Cloud Platform

Version Control:

Git, GitHub

Tools:

VS Code, Chrome Dev Tool

PROJECTS

Amazon Clone

Web application created with **React** and deployed using **Google Firebase**.

React Router for UI, React Context API for basket, user authentication, and payment functionality with Stripe.

[Deployed Website](#) | [GitHub Repository](#)

Photographer Portfolio

Responsive web design coded from scratch using **SCSS** and extensive use of **Flexbox** for the user interface, and JavaScript for responsive navbar and hamburger menu.

Designed the website mockup using **Figma** before the actual coding.

[Deployed Website](#) | [GitHub Repository](#)

Google Maps Store Locator

A website with search functionality integrated with the **Google Maps API**.

Search input looks for **JSON** list of stores and returns the filtered results on the map.

[Deployed Website](#) | [GitHub Repository](#)

Tech Company Website

Clean and modern website developed using **Tailwind CSS (CSS Framework)**.

The inspiration for the design comes from tech-related startups and companies.
