SUMMARY

Front-end developer with a background in business administration and digital marketing. Attentive to detail and an eye for designing user interfaces. Keen on creating good solutions with a good user experience using HTML5, CSS3/SCSS, and JavaScript. Currently looking for the right opportunity where I can put my skills into practice while continuously expanding my knowledge within web development.

SKILLS

Web Technologies:

HTML5, CSS3,
Sass/SCSS, Bootstrap, Tailwind

Programming Language:

JavaScript

Design:

Figma, Adobe XD

Web Server:

Firebase, Google Cloud Platform

Version Control:

Git, GitHub

Tools:

VS Code, Chrome Dev Tool

PROJECTS

Amazon Clone

Web application created with **React** and deployed using **Google Firebase**.
React Router for UI, React Context API for basket, and user authentication.

[Deployed Website](#) | [GitHub Repository](#)

Photographer Portfolio

Responsive web design coded from scratch using **Sass/SCSS** and extensive use of **Flexbox** for the user interface, and JavaScript for responsive navbar and hamburger menu.
Designed the website mockup using **Figma** before the actual coding.

[Deployed Website](#) | [GitHub Repository](#)

Google Maps Store Locator

A website with search functionality integrated with the **Google Maps API**.
Search input looks for **JSON** list of stores and returns the filtered results on the map.

[Deployed Website](#) | [GitHub Repository](#)

Tech Company Website

Clean and modern website developed using **Tailwind CSS (CSS Framework)**.
The inspiration for the design comes from tech-related startups and companies.
